PROFESSIONAL SUMMARY

Quality Assurance and Compliance professional with 8+ years of experience in insurance operations, document and transaction monitoring, fraud risk identification, agent onboarding, and process compliance. Experienced in quality reviews, discrepancy management, root cause analysis, stakeholder feedback, quality reporting, and SLA monitoring. Hands-on experience in User Acceptance Testing (UAT) for health insurance product launches, system enhancements, and business form changes, with a focus on accuracy, compliance, and process improvement.

PROFESSIONAL EXPERIENCE

Senior Customer Care Executive – Backend Operations

RSystems International Ltd., Noida | Dec 2022 – Present

- Manage the IRS (International Recovery System) process for a US-based third-party client, handling Key Quote, Key Auto Approval, and Key Completion activities.
- Use RDN, ClearData, Web Tracker, Wombat, and iBeam to process key fee requests, generate invoices, attach key receipt documents, and communicate updates to clients.
- Retrieve documents and upload receipts through the client portal, maintaining billing accuracy and compliance.
- Coordinate with cross-functional teams to support timely task completion, accurate reporting, and smooth backend operations.
- Recognized multiple times by the team leader, including through Amazon voucher rewards, for consistently meeting daily TAT with zero errors.

Quality Analyst – Agent Onboarding & Compliance (Partner Licensing)

CSOS Corporate Solutions Pvt. Ltd. (Client: Niva Bupa Health Insurance), Noida | 2016 – 2022

- Managed agent code generation for Normal Agents, IMFs, Brokers, Web Aggregators, and POSP Agents across PAN-India branches by verifying required documents and system entries and coordinating discrepancy resolution.
- Created agencies on the IRDAI portal within required regulatory timelines.
- Supported sales teams by phone and email to resolve discrepancies and process-related queries.
- Updated agent details and maintained agent-to-salesperson mapping in CRM systems.
- Analyzed recurring errors, performed root cause analysis, provided structured feedback to sales teams, and prepared quality and compliance reports for management.
- Identified suspected fraudulent documentation during Partner Licensing quality checks, including fake signatures and certificates altered to show another person’s name, and escalated cases to the Fraud Risk Control team.
- Handled end-to-end UAT for product, plan, system, and form changes; logged defects, coordinated fixes with developers, and retested changes before production release.

Quality Analyst – New Business

CSOS Corporate Solutions Pvt. Ltd. (Client: Niva Bupa Health Insurance), Noida | May 2014 – 2016

- Performed quality checks on new business health insurance applications by verifying supporting documents and system entries for accuracy and completeness.

SELECTED PROJECTS

Document Fraud Detection & Escalation

2017 – 2019 | Quality Assurance / Fraud Risk & Compliance | Process: Partner Licensing, Niva Bupa

- Reviewed agent onboarding documents and system entries to identify inconsistencies and suspected fraudulent documentation.
- Identified suspected fraud indicators, including fake agent signatures and certificates altered to show another person’s name.
- Flagged suspected cases, stopped further processing where required, and escalated them to the Fraud Risk Control team for review.

User Acceptance Testing (UAT) – Products, Plans & Forms

2019 – 2022 | Niva Bupa (New Business & Partner Licensing)

- Executed end-to-end UAT for new health insurance product and plan launches, enhancements to existing products/plans, and physical application form changes.
- Validated corresponding software changes against business and user requirements, including newly added or modified fields and mandatory/non-mandatory configurations.
- Identified bugs and discrepancies and maintained an Excel-based defect tracker to document issues and share them with the development team.
- Coordinated directly with developers to clarify defects, track fixes, and resolve issues; retested every fix and returned unresolved defects for further correction.
- Repeated testing and retesting until the changes met requirements, then passed validated items to support production readiness and product/plan launch.
